Hi Dan,

My cell phone and only number of contact is shown below in my signature. I will read through the SAPP and the HASP before next week. See you next Monday at 2PM.

Thanks,

Jason Willis | Mine Restoration Project Manager

Subject: Silverton Sampling

Hi All

We are on for sampling next week. It looks like flows are finally picking up in the Animas and hopefully things will be melted off enough for access to some of our higher elevation sites.

I have attached the Health and Safety Plan (HASP). Please read before getting to the site. You MUST sign off on having read the HASP before you can start sampling. We will be meeting at station A68, which is located where the 14th st bridge crosses the Animas River (near the Kendall Mtn Recreation Area) on June 8th at 2 pm. We will be providing a safety briefing, HASP sign-off, brief training on sampling protocols and general logistics.

Gear and clothing-Be prepared for anything would be my suggestion. It has been a weird year and you could be snowed on or it could be warm. Count on it being muddy. Bring snowshoes and waders if you have them and the obvious things like sunscreen, sun glasses, hat etc. Also, I would recommend a personal cooler or something to pack around some food as we will likely be eating in the field.

Below is a link to the sampling plan which includes SOPs. Please let me know if you have trouble downloading.

<https://drive.google.com/file/d/0BxEIQFmtIsiDZmhNXzJzMi1nMnc/view?usp=sharing>

Please forward me your cell number as well if you know I don't have it. I will be putting together a list of to share with everyone.

Thanks for your support in this effort and if you have any questions or concern do not hesitate to call me directly.
